

The New American Home 2012

Phantom's motorized screens complete an outdoor living space in Orlando, FL

“The SuperScreen 17/17 mesh maintains visibility to the pool area while filtering up to 90% of UV rays. This helps to reduce cooling costs and keeps their artwork from fading in sun.”

- LOCATION:** Orlando, Florida
- STYLE:** Modern Contemporary
- ARCHITECT:** Phil Kean, LLC
- PRODUCT:** Phantom Executive™ motorized retractable screens
- MESH TYPE:** SuperScreen 17/17 mesh
- NEED:** The architects wanted to find a way to open up the kitchen, dining and family rooms to the outdoors without having to worry about bugs or strong UV rays.
- SOLUTION:** Phantom's motorized screens were added to provide a seamless flow from the indoor to outdoor living spaces. The screens allow a good view to the pool and natural ventilation, while keeping out insects and harmful UV rays.

OVERVIEW

The New American Home is built annually as a centerpiece for the National Association of Home Builders (NAHB) International Builders' Show. Located in Orlando, Florida this home gives industry professionals a chance to see design trends, construction techniques, and materials that can be used in any new or remodeled home.

In combination with moveable glass walls, the architect chose Phantom's motorized screens to maximize the homes indoor and outdoor living areas. The screens provide insect protection, solar shading and clear views to the pool so the backyard can be used for entertaining and relaxing all year round.

APPLICATION HIGHLIGHTS

Maintain the views with UV protection

The SuperScreen 17/17 mesh maintains a good view to the pool area while filtering up to 90% of UV rays. This helps to reduce cooling costs and also protects their artwork from fading in sun.

Let in the breeze without the bugs

The SuperScreen mesh allows a breeze to flow through the home without having to worry about letting in bugs.

Complements any home

Phantom's motorized screens retract into cavities designed above the openings, completely hiding them from view. This way the screens don't distract from the design of the home.
